

## Software engineer

KAISER group has developed a leading international market position as manufacturer of sewer cleaning vehicles, industrial waste disposal vehicles and mobile walking excavators. The company has approximately 500 employees in Liechtenstein, Austria, Slovakia, Finland, Italy and the USA.

At our headquarter location in Liechtenstein, we are looking for a Software Engineer / PLC programmer to strengthen our team. In this versatile and attractive position, you will be responsible for developing and expanding the control concepts of the leading international product portfolio in the field of mobile walking excavators and sewer cleaning vehicles.

### YOUR DUTIES

- > Development of control concepts for our innovative machines
- > PLC and HMI programming
- > Implementation of individual customer solutions
- > Creation of the associated documentation
- > Commissioning and testing of the equipment
- > Close cooperation with other departments such as production, after-sales service and the different production sites

### YOUR PROFILE

- > Bachelor's degree in a controls related field (Electrical Engineering or equivalent)
- > Experience with industrial PLC programming IEC 61131, structured text, ideally CoDeSys
- > HMI and electrical CAD experience
- > Knowledge in CAN-Bus (CAN J1939) or CANopen
- > Interested in specialty vehicles / construction equipment
- > Good English or German language skills

We offer you a versatile and interesting field of activity in an efficient and future-oriented Company.

If you are interested in this challenging position and appreciate a dynamic environment, we look forward to receiving your application, preferably by e-mail to [personal@kaiser.li](mailto:personal@kaiser.li)
